

APSS 2022

The 9th International Conference on Astrophysics and Space Science (APSS 2022) will be held during December 9-11, 2022 in Sanya, China. APSS is an annual regular conference since 2015 and has been successfully held in Shanghai, China and Bangkok, Thailand. It covers issues on Celestial mechanics, Life sciences as related to space, Solar and stellar physics, Theoretical astrophysics, High-energy astrophysics, Particle astrophysics, etc. APSS 2021 will

be a valuable and important platform for inspiring Int'l and interdisciplinary exchange at the forefront of Astrophysics and Space Science.

CALL FOR PAPERS

Celestial mechanics
Cosmic rays and gamma astronomy
Cosmology
Earth-moon system
Earth's surface
Extragalactic astronomy
Extrasolar planets
Heliospheric physics
Interstellar matter
Planets ionospheres & magnetospheres
Life sciences as related to space
Magnetospheric physics
Miscellaneous
Planets, comets, asteroids & dust
Scientific instrumentation
Solar and stellar physics
Solar terrestrial physics
Solar terrestrial relations
Interstellar terrestrial relations
Theoretical astrophysics
High-energy astrophysics
Particle astrophysics

Venue

Sanya is superior in geography climate and natural resources. It is known as "the oriental Hawaii" and "Sunshine City" because of its special tropical scenes as well as its attractive nature. Sanya's tourist resources, richly endowed by nature, are not only special in China, but also rare in the world. It is a most fashionable place where tropical marine tourist resources are closely concentrated and lovers of swimming can enjoy their holidays in winter. Within the city, well-known tourist spots are dotted everywhere--the national Yalong Tourist Area, the Tianyahaijiao, the Great Eastern Sea, the Luhuitou Peninsula, Sanya Bay and the Luobi Grotto. Besides these, there remain the ancient Yazhou City and relics and a sculpture of the Monk Jianzhen of the Tang Dynasty, who landed ashore to avoid the storm when he was sailing eastwards to Japan.
